Alconsult International Ltd. is an experienced, upstream, multi-disciplinary consulting company based in Calgary, Canada that provides advisory, management, and technical services to the Canadian and international oil and gas industries. Alconsult's Principals and Associates have 30+ years of experience in their areas of expertise, which includes living and working in many countries around the world, as well as in Canada.

The worldwide scope of services includes:

- Geosciences, engineering and business/economic evaluations
- Integrated technical, operations and project management
- Corporate development and business strategy implementation
- Framing of new country and new basin-entry opportunities
- Reserves and resource assessments; due diligence on property transactions
- Geomatics, GIS, mapping and Data Analytics support
- Exporting Canadian technical E&P experience through mentoring and training of personnel from indigenous and National Oil Companies
- Advising and supporting asset positioning for securing JV partners, mergers or divestitures

Alconsult has worked for many private and public companies around the world, provided technical and advisory support services for government agencies, compiled multi-client geotechnical reports, and provided support for hydrocarbon policy and contracts development.

Alconsult has prepared a number of country and basin focused hydrocarbon studies for National Oil Companies and industry clients to assist in determining the hydrocarbon resources of the country or target basins and regions.

Alconsult International is currently marketing a Mexico multi-client study entitled **"Preparing for Mexico Upstream Investments."** For more information or to schedule an info session, please go to www.alconsult.net/mexico.
