

PREPARING FOR MEXICO UPSTREAM INVESTMENTS PART C: HISTORICAL NORTH AMERICAN (MEXICO, US AND CANADA) RESOURCE PRICE AND ECONOMICS DATA CONTEXT

COMPONENT OVERVIEW

FIRST EXTERNAL RELEASE DATE:
AVAILABLE NOW

EXPECTED FINAL DELIVERABLE:
AVAILABLE NOW

The **HISTORICAL NORTH AMERICAN (MEXICO, US AND CANADA) RESOURCE PRICE AND ECONOMICS DATA (PART C)** component provides historical background reference crude oil and natural gas resource price data as well as economic data (exchange rates, inflation, etc.) for three North American countries—Mexico, United States and Canada packaged together with a Data Analytics analysis engine (Spotfire Webplayer).

This analysis module provides context for historical resource prices and upstream project performance at project hydrocarbon points-of-sale throughout North America. Price differentials for crude quality and delivery points can easily be calculated and analyzed. Such data is important background information used to develop forward looking price assumptions for economic modeling.

Many foreign companies currently considering Mexican projects have current working interests in existing upstream projects elsewhere throughout North America and as a result various points of internal reference and comparison.

This product can be purchased separately or else is also included for purchasers of Alconsult's full integrated Mexico Study.

SYNERGY WITH OTHER COMPONENTS FROM ALCONSULT'S 2015 MEXICO STUDY

.....

1. Alconsult's **MEXICO COMMERCIAL/LEGAL REPORT (PART B)** comprises three sections: (1) A Review of Mexico's Petroleum Industry; (2) A Review of Fiscal Terms and Economics relating to upstream petroleum projects; and (3) A Step-by-Step Guide and Legal Compliance Checklist for foreign petroleum exploration and production companies desiring to participate in Mexico.
2. Alconsult's **MEXICO PROJECT ECONOMICS FOR TYPE PROJECTS (PART F)** product assesses economic performance measures and the economic viability of each of six (6) defined and relevant crude oil and natural gas exploration/ development project cases based on representative go-forward type projects in Mexico's sedimentary basins.
